DETAILED ACTION

Election/Restrictions

1. Amended claims 1, 3, 4, 8, 9, 24-36 and newly submitted claims 40-46 are directed to an invention that is independent or distinct from the invention originally elected in the reply filed 03/15/07. The Applicant's response to the restriction requirement set forth on 02/12/07 resulted in the election of Invention I (apparatus) and species (a) (Figs. 1-3). As a result, claims 10-17 and 19-23 were canceled and claims 2 and 5-7 were withdrawn as not being drawn to the elected species. The limitation directed toward the anti-rotation element (see amendment 09/05/07, claims 1, 26, 40-46) is directed toward a non-elected species and was previously canceled from the claims (see original claims 10-12) as not being directed toward the elected invention.

Accordingly, claims 1, 3, 4, 8, 9, 24-46 are withdrawn from consideration as being directed to a non-elected invention. See 37 CFR 1.142(b) and MPEP § 821.03.

Claim Objections

2. Claims 37-39 are objected to because of the following informalities: Claims 37-39 have not been previously submitted and therefore the status identifier should have been (new) rather than (previously presented) or (withdrawn). Appropriate correction is required.

3. Applicant is advised that should claims 2-4 be found allowable, claims 37-39 will be objected to under 37 CFR 1.75 as being a substantial duplicate thereof. When two

Art Unit: 3731

claims in an application are duplicates or else are so close in content that they both cover the same thing, despite a slight difference in wording, it is proper after allowing one claim to object to the other as being a substantial duplicate of the allowed claim. See MPEP § 706.03(k).

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. **Claim 18 is rejected under 35 U.S.C. 103(a) as being unpatentable over Fischell (USPN 5,792,144) in view of Wilson (USPN 6,019,778) and further in view of Vrba (USPN 6,254,609).**

6. Fischell discloses the invention substantially as claimed as stated above except for the sheath portion being made from a nylon-coated polyimide.

7. Wilson discloses a sheath with an outer layer that is preferably nylon bonded to an inner layer that is preferably PTFE. (Col 6, line 33-39)

8. It would have been obvious to one having ordinary skill in the art at the time of the invention to incorporate a sheath with a nylon outer layer and a PTFE inner layer since Wilson discloses that this is a preferable combination of materials for a sheath in a stent deliver device. The inventions are analogous with each other and the instant invention and therefore the combination is proper.

Art Unit: 3731

9. Fischell in view of Wilson does not disclose that the inner layer is a polyimide but rather a PTFE.

10. Vrba discloses that it is well known to substitute polyimide for PTFE as an inner layer of a sheath that is in direct contact with a stent.

11. It would have been obvious to one having ordinary skill in the art at the time of the invention to incorporate polyimide into the inner layer of the sheath in place of PTFE. Fischell in view of Willson discloses the claimed invention except for PTFE instead of polyimide. Vrba shows that polyimide is an equivalent material known in the art. Therefore, because the two materials were art recognized equivalents at the time of the invention was made, one of ordinary skill in the art would have found it obvious to substitute the polyimide for PTFE.

Response to Arguments

12. Applicant's arguments with respect to claim 18 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

13. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

Art Unit: 3731

In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
